AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0020] with the following amended paragraph:

[0020] A recess 204, which may be seen most clearly in FIGS. 2 and 7, is formed in the plug 104. The recess 204 includes a plurality of engagement sections 206 that extend substantially perpendicularly away from an inner surface 208 of the recess 204. The segment seal assembly 106 is at least partially disposed within the recess 204 and is held within the recess 204 by the engagement sections 206. Thus, the segment seal assembly 106, which will now be described, rotates with the plug 104.
